## 一、文勇的新托福黄金精选真题阅读 11.7 版本更改记录

由这些颗粒组成的水床非常普遍，通常位于看不见的土壤下方，在湍急的河流曾经流过的地方都能找到它们的踪迹。‘

替换为

“由这些颗粒组成的水床非常普遍，通常位于看不见的土壤下方，在携带粗糙沉淀物的湍急的河流曾流过的地方都能找到它们的踪迹。”

由因此，使用观察评估技术研究婴儿感知能力时，需要注意的是不能笼统概括数据或者仅仅靠一两个研究就作为特殊的婴儿感知能力的研究证据。‘

改成因此，当观测式评估被用作研究婴儿感知能力的技术时，必须注意不要从资料中过度归纳出结论，或（不要）将一个或两个研究作为婴儿一项特殊感知能力的决定性证据。

1. TP026-1 Energy and the Industrial Revolution 第一段第三行 Increased efficiency 前增加一个句点
2. TP025-2 第三段 第二行 father and father away 改为 farther and farther away;
3. TP025-2 第四段 倒数第一行 no long 改为 no longer
4. TP025-2 第五段 Voyaga 改为 Voyage

12: Look at the four squares [■] that indicate where the following sentence could be added to the passage.

The increase in reward still did not attract young people to this hard life, and convicted criminals and slaves were pressed into services

Where would the sentence best fit?

这道题是错题，请大家先不要关注。

## 二、文勇的新托福黄金精选真题阅读 11.6 版本更改记录

更改了 TP021 Autobiographical Memory 最后一题的答案 TP025 的答案

更改了 TP012 阅读第三篇第一段，four inches 翻译的是四次改为四英寸

更改了 Planets in Our Solar System 最后一题的题号

更改了翻译

The final stage of a succession, called the climax by Clements and early ecologists, is likewise not predictable or of uniform composition. There is usually a good deal of turnover in species composition, even in a mature community. 这种顺序的最终阶段，被克莱门茨和早期的生态学家称为顶级群落，同样也无法预料，没有统一的结构。（顶级群落中）物种的构成通常会有很高的变更率，即使是在成熟的群落中（也同样如此）。

增加的亮点：全真考试体验：所有的文字统一更改了实际考试时所使用的字体  
**Arial**

## 二、文勇的新托福黄金精选真题阅读 11.5 版本更改记录

美化了板式

TOP4 Deer Populations of the Puget Sound

Answer of 2 should be 3

And Hide answer in blue color of 5,6,7,8,9,10,11 is not right.

4.The word “suppress” in the passage is closest in meaning to

- respond to
- warn against
- avoid the impact of
- stop by force

更改了 warn against 这个选项的排版

Paragraph 2: Nearly any kind of plant of the forest understory can be part of a deer's diet. Where the forest inhibits the growth of grass and other meadow plants, the black-tailed deer browses on huckleberry, salal, dogwood, and almost any other shrub or herb. But this is fair-weather feeding. What keeps the black-tailed deer alive in the harsher seasons of plant decay and dormancy? One compensation for not hibernating is the built-in urge to migrate. Deer may move from high-elevation browse areas in summer down to the lowland areas in late fall. Even with snow on the ground, the high bushy understory is exposed; also snow and wind bring down leafy branches of cedar, hemlock, red alder, and other arboreal fodder. 【TPO4-Deer Populations of the Puget Sound】

3. The word "inhibits" in the passage is closest in meaning to

- consists of
- combines
- restricts
- establishes

更改了答案 2→3

Paragraph 4: The two processes produced very different results. The daguerreotype was a unique image that reproduced what was in front of the camera lens in minute, unselective detail and could not be duplicated. The calotype could be made in series, and was thus the equivalent of an etching or an engraving. Its general effect was soft edged and tonal.

3.The word "duplicated" in the passage is closest in meaning to

- copied
- replaced
- handled
- clarified

更改了答案 3→1

Paragraph1: In the Mesa Verde area of the ancient North American Southwest, living patterns changed in the thirteenth century, with large numbers of people moving into large communal dwellings called pueblos, often constructed at the edges of canyons, especially on the sides of cliffs. Abandoning small extended-family households to move into these large pueblos with dozens if not hundreds of other people was probably traumatic. Few of the cultural traditions and rules that today allow us to deal with dense populations existed for these people accustomed to household autonomy and the ability to move around the landscape almost at will. And besides the awkwardness of having to share walls with neighbors, living in aggregated pueblos introduced other problems. For people in cliff dwellings, hauling water, wood, and food to their homes was a major chore. The stress on local resources, especially in the firewood needed for daily cooking and warmth, was particularly intense, and conditions in aggregated pueblos were not very hygienic.

1. The word traumatic meaning to

- Essential
- highly stressful
- highly unusual
- unwise

2. The word intense in the passage is closest in meaning to

- strong
- questionable
- obvious
- deliberate

更改第一题、第二题词汇格式

paragraph4: Another important push was the onset of the Little Ice Age, a climatic phenomenon that led to cooler temperatures in the Northern Hemisphere. Although the height of the Little Ice Age was still around the corner, some evidence suggests that temperatures were falling during the thirteenth century. The environmental changes associated with this transition are not fully understood, but people living closest to the San Juan Mountains, to the northeast of Mesa Verde, were affected first. Growing food at these elevations is always difficult because of the short growing season. As the Little Ice Age progressed, farmers probably moved their fields to lower elevations, infringing on the lands of other farmers and pushing people together, thus contributing to the aggregations. Archaeologists identify a corresponding shift in populations toward the south and west toward Mesa Verde and away from higher elevations.

7. The word transition in the passage is closest in meaning to

- change
- climate
- decline
- problem

更改第七题词汇格式

更改了 The term “art deco”的拼写错误

更改○ Late nineteenth century studies of Aboriginal rock art failed to recognize that a variety of styles existed. Railed→fail 的错误

### 三、文勇的新托福黄金精选真题阅读 11.4 版本更改记录

4. The word “suppress” in the passage is closest in meaning to
- respond to
  - warn against
  - avoid the impact of
  - stop by force

更改了 warn against 这个选项的排版

Paragraph 2: Nearly any kind of plant of the forest understory can be part of a deer's diet. Where the forest inhibits the growth of grass and other meadow plants, the black-tailed deer browses on huckleberry, salal, dogwood, and almost any other shrub or herb. But this is fair-weather feeding. What keeps the black-tailed deer alive in the harsher seasons of plant decay and dormancy? One compensation for not hibernating is the built-in urge to migrate.
